

DAVE ANCEL, ED.D.

- Expert in Strategic Thinking, Planning and Implementation
- Strategy Development/Workplace Strategy for Top Executives and Their Teams
- Senior Consultant, Facilitator and Coach

Dave Ancel is a senior level consultant, facilitator and coach and expert in strategic thinking, planning and implementation. Dave works in partnership with executives in organizations to assist them with the nuances of developing the right strategic plan for their organization to meet their corporate goals and exceed their business plans.

Dave has served as co-manager and partner at Emergent Solutions, Inc. where he also served as the practice leader for Strategy Development and Workplace Strategy for top executives and their teams. Dave has designed and led numerous strategic thinking and planning, distributed workplace, and Future of Work projects since 1992. His deep background in organization design and development is focused on ensuring the best organizational structure and cross-functional relationships to support the social practices and business processes that make an organization unique and successful.

Dave works with clients to assess their strategic objectives and specific business targets, document workflows and make recommendations for improvement, analyze social networks and cultural practices, review collaboration technologies and their use, and co-create design criteria for specific critical deliverables and improved corporate results.

In a prior life, Dave founded Interplay Learning Corporation where he developed interpretive assessment methodologies used to identify social practices and document business workflows. He has strong international experience in Asia, Europe and Latin America – having lived for many years in Indonesia and Chile – and is fluent in Spanish. He works globally with companies throughout the high-technology, bio-technology and financial services world including Sun Microsystems, Cisco Systems, Capital One Financial, Beckton-Dickinson Biosciences and Numico B.V.

Dave holds a doctorate in organization and leadership from the University of San Francisco where he focused on the relationship of technology and culture in the global workplace. He is a member of CORENet Global.
